If you see this, your box didn't boot to Linux.
Unless you interrupted the boot process, this usually means that you have no valid operating system in flash.
Don't panic! It's not a problem. You can just flash a new version and everything will be fine!
Otherwise, you can [load from network](#) or [USB](#).
If you're about to give up, you might get help at [the Dream Multimedia Support Board!](#)
Currently there aren't many other features...

You can download your current flash contents (64 MB) [here](#), but please don't expect to be able to flash it back. It's merely a debugging feature.
This device's Serial Number is 82618, and was built on 2011/08/16.
Bootloader version: Dreambox Second Stage Loader BUILD #79, built 20100605
